Owner/Developer	Royal Capital Group LLC. and Maures Development
General Contractor	North Track Construction
PL Freeman Division	HVAC Design Build
Contract Amount	\$555,143
Lost Time Accidents	0
Location	Milwaukee, Wisconsin

Summary

In December of 2018, the P.L. Freeman Company was selected as the prime HVAC Contractor by North Track Construction for the Fortitude Apartments. This 65 Unit Multi Family Apartment buildings lies in the heart of Milwaukee Northwest Side.

On this Project P.L. Freeman Co. worked closely with our industry partners Quality Heating, North Track Construction, and Zimmerman Architectural Studios to conceptualize the HVAC Design systems for the 65 residential units.

The P.L. Freeman Co. design team utilized Revit, a 3-D BIM modeling software, to layout the HVAC equipment, ductwork, and lead MEP coordination process. At P.L. Freeman Co. our use of Revit provides numerous benefits to our customers. In our MEP coordination meetings, our designers have the proven ability to solve conflicts before they happen in the field. This ensures enhanced construction practices and a project on time and in budget.

Our union Sheetmetal workers installed the residential equipment, including furnaces, ducted heat pumps, air-conditioning condensers, line-sets, sheet metal and controls for all the residential units across 4 floors. Our service team provided leak testing, evacuation, refrigerant charging, and start up services.

This project was a total success leaving the customer happy and satisfied.
